Bookify: Online Bookstore Web Application

Project Report

Submitted as Partial Fulfillment of
Master of Computer Applications
Semester – IV

Developed at
Maxgen Technologies Pvt. Ltd.

Developed by
Khan Abubakar (202400719010097)

Under Guidance of
Dr. Darshita Kalyani, FCAIT
Mr. Pankaj Sir, Maxgen Technologies Pvt. Ltd.
Ms. Agresha Ma'am, Maxgen Technologies Pvt. Ltd.

Faculty of Computer Applications & Information Technology (FCAIT)

GLS University
Ahmedabad-380 006

Project Profile

Project Title:	**Bookify**: A Full Stack Online Bookstore Web Application
Description:	**Bookify** is a modern online bookstore web application designed to enable users to browse, purchase, and manage books in a secure and efficient digital environment. The platform provides features such as book browsing, Wishlist management, shopping cart functionality, order placement, payment integration, reviews and ratings, and return or replacement requests.
Aim:	The primary aim of the **Bookify – Full Stack Online Bookstore Application** is to design and develop a secure, scalable, and user-friendly e-commerce platform that allows users to discover books, manage their purchases, and experience seamless online book shopping.
Category:	Web Application / Database / Internet / Client–Server System
Developed at:	Maxgen Technology Pvt. Ltd.
Tools Used / Required:	Development side ➢ Hardware: Laptop ➢ Software: ✓Operating System: Windows 11 ✓Front End: React, HTML, CSS, JS. ✓Back End: Spring Boot ✓ORM: Hibernate ✓Database: MySQL ✓Security: Spring Security, JWT ✓Payment Integration: Razorpay ✓Report Generation Tool: Admin Dashboard ✓Build Tool: Maven ✓Api Testing tool: Postman ➢ Architecture: Client – Server Architecture. Deployment side ➢ Hardware: Laptop

Declaration of Originality and non-plagiarized content

I hereby declare that the work presented in this project report titled **"Bookify – Online Bookstore Web Application"** is my own original work and has been carried out by me under the guidance of my project mentor.

I confirm that this project has not been copied from any other source, and no part of this report has been plagiarized. All the information, data, code, and references used in this project have been properly acknowledged and cited wherever necessary.

I further declare that this work has not been submitted previously, either in part or in full, for the award of any other degree, diploma, or certification at any institution.
I take full responsibility for the authenticity and originality of the content presented in this report.

Name: Abubakar Khan
Course: Master of Computer Applications (MCA)
College Name: Faculty of Computer Application & IT
University Name: GLS University
Date: 03/04/2026

Acknowledgement

We would like to express our sincere gratitude to all those who have contributed to the successful completion of the **Bookify – Online Bookstore Web Application** project.

First and foremost, we extend our heartfelt thanks to our project guide, **Dr. Darshita Kalyani**, for her valuable guidance, continuous support, and encouragement throughout the development of this project. Her insights and suggestions played an important role in shaping the outcome of our work.

We would also like to thank **Dr. Devarshi Mehta** (Project Coordinator) for his support and coordination, and **Dr. Harshal A. Arolkar** (Professor & Head, PG Programme) for providing us with the opportunity and a supportive academic environment to complete this project successfully.

We are grateful to GLS University for providing the necessary resources and infrastructure required for this work. We also appreciate everyone who contributed ideas, feedback, and technical support during the development of this application.

Lastly, we thank our family and friends for their constant encouragement and support.

This project has been a valuable learning experience, helping us enhance our skills in full stack development and build a user-friendly online bookstore platform.

Introduction to Company & Guide

Introduction to Company

My internship is working at **Maxgen Technologies Pvt. Ltd.**, a well-known organization specializing in IT training, software development, and professional skill enhancement. The company focuses on bridging the gap between academic learning and industry requirements by providing practical, hands-on experience to students.

Maxgen Technologies offers training in various domains such as **Java Full Stack Development**, **Web Development**, **Python**, **Data Science**, and **Mobile Application Development**. The organization is committed to delivering quality education and real-time project exposure, helping students become industry-ready professionals.

About My Guide

During my internship at Maxgen Technologies Pvt. Ltd., I was guided by **Pankaj Sir** having **2** years of experience and **Agresha Mem** having **3** years of experience, who played a crucial role in my learning journey. My guide provided continuous support, technical knowledge, and valuable insights throughout the project.

They helped me understand core concepts, resolve **technical challenges**, and improve my **problem-solving skills**. Their guidance ensured that I followed proper coding standards, project structure, and best practices used in the industry.

Brief Introduction About System

In today's digital era, online shopping platforms have become an essential medium for purchasing products conveniently and efficiently. E-commerce applications have transformed the way users browse, select, and buy products by providing seamless digital experiences. Inspired by such platforms, this project presents **Bookify – a Full Stack Online Bookstore Web Application** developed using modern industry technologies including **React.js** for the frontend, **Spring Boot with Hibernate (JPA)** for the backend, and **MySQL** for database management.

The system is designed using a secure and scalable **client–server architecture** where users can register, log in using **JWT-based authentication**, browse books, add items to their cart or wishlist, place orders, write reviews, and manage their profiles. The application also supports **secure payment integration, order tracking, and return or replacement requests**, ensuring a smooth and reliable purchasing experience for users.

This project demonstrates the practical implementation of **RESTful APIs**, secure authentication and authorization using **Spring Security**, proper relational database design with **JPA mappings**, and responsive user interface development using modern frontend tools and frameworks. Overall, the system reflects an **industry-level full stack e-commerce application** that emphasizes security, scalability, performance, and modern web development practices.
